WATER

MANAGEMENT

Administration

Privatization Needs the Professional Approach. Garret P. Westerhoff **Feb. p.25**
Special Infrastructure Report: How Big is the Problem? Virgil W. Langworthy **May p.13**
Special Infrastructure Report: Time and Institutional Requirements. Daniel P. Sheer **May p.14**
Regionalization: A Decade Points to More Change. Len Hill **June p.40**

Planning, Scheduling and Operations

Doing a Job on Data. Robert L. Hentrich, Jr., Robert Baird, and Ronald R. Himebaugh **Jan. p.26**
Vibration Analysis is Hub of Predictive Maintenance Scheme. Walter Kopczynski **Jan. p.36**
What to Look for in Contract Service Firms. William A. Callegari **Feb. p.29**
Computerization Can Be Painless and Successful. Arthur E. Bear **Feb. p.32**
Maintenance Management in a Special Kind of Treatment Plant. Terry R. Larson and Kenneth L. Sedmark **Feb. p.34**
Special Infrastructure Report: The Barrier to Upgrading Funding. Richard O. Walker, Jr. **May p.22**
Special Infrastructure Report: Overcoming the Barriers. Jerome B. Gilbert **May p.28**
Special Infrastructure Report: Alternative Solutions. John J. Boland **May p.33**
Special Infrastructure Report: Planning a Rehabilitation Program. **May p.41**
Special Infrastructure Report: Evaluating Utility System Conditions. **May p.43**
Special Infrastructure Report: Deciding to Rehabilitate, Repair or Replace. **May p.50**
Special Infrastructure Report: Philadelphia Formulates a Comprehensive Main Rehab Program. Paul Hersch **May p.61**
Capital's Water System Immersed in History. Staff Report **June p.27**
Computerization Can Boost Utility Performance. Richard L. Shell and Nicholas A. Damachi **June p.30**
Model Your Way to Energy Savings. Edward L. Rushbrook, Jr. **Aug. p.32**
Energy and Profit: Products of Cogeneration. Harold C. Moke **Sept. p.46**
Auditing a Water Distribution System Points to Improvements. Kent A. Cori **Oct. p.25**

SUPPLY & RESOURCE

Ground

Groundwater Protection: A Contrast in State Style. Jeanette L. Moorhouse **Mar. p.23**

Surface

Water Resource Plan Produces Multiple Benefits. Victor French **Mar. p.28**

Reuse

Reclamation Works in Mission Viejo. Staff Report **Aug. p.27**

Transmission & Storage

Pumps Crucial to Success of Long-Distance Aqueducts. Igor Karassik **June p.35**

TREATMENT

Design

Stabilizing Water with Chemical Doses. Thomas M. Walski, Joe M. Morgan, and Marion W. Corey **Oct. p.36**

Coagulation & Flocculation

Texas Boomtown Gets New Gusher. Robert C. Burrows, S. A. Webb, and Dale Storm **July p.26**

Filtration & Solids Handling

High-Tech Water in the Green Fields of Iowa. Staff Report **Jan. p.33**
Filter Bed Rebuilding Job Gets Vacuum Boost. Len Lipp **Mar. p.26**
On-Line Particle Counting Improves Filtration Efficiency. C. William Hutchinson **July p.20**
Advanced Technology Makes Mountain Run-Off More Palatable. William Powell **July p.30**

DISTRIBUTION

Pumping

Motor Control Eliminates Erratic Distribution Pressure. Gene Watts **Oct. p.38**

Piping

Special Infrastructure Report: Pipeline Rehabilitation Methods. **May p.53**
Try Tackling a Corrosion Investigation. David W. Heumann **Oct. p.32**

Storage

Try Tackling a Corrosion Investigation. David W. Heumann **Oct. p.32**

INSTRUMENTATION

Design

Instrumentation: Trends and Developments. R. H. Babcock **Nov. p.20**
Adapting Software Improves Digital Control. Robert J. Eskridge and C. William Hutchinson **Nov. p.22**
Ultrasonics and Microcomputers Measure Open Channel Flow. Dan Soltz **Nov. p.25**
Selecting and Applying Magnetic Flowmetering Systems. M. F. Griffin **Nov. p.33**
Automating the Water Lab—And Using the Results. J. G. Jones **Nov. p.36**
Experience is Framework of Instrumentation Manual. **Nov. p.40**

WASTEWATER

MANAGEMENT

Administration

Privatization Needs the Professional Approach. Garret P. Westerhoff **Feb. p.25**
Special Infrastructure Report: How Big is the Problem? Virgil W. Langworthy **May p.13**
Special Infrastructure Report: Time and Institutional Requirements. Daniel P. Sheer **May p.14**

CAIROX®
Potassium Permanganate
"THE OXIDANT OF CHOICE"

FOR
HYDROGEN SULFIDE OXIDATION
AND
SLUDGE ODOR CONTROL

Extensive field testing has conclusively proven CAIROX to be the cost effective oxidant for most water and wastewater treatment systems.

So why not give us a call for a laboratory evaluation and/or plant trial? Compare the cost and effectiveness of CAIROX to other available oxidant systems and judge for yourself.

CALL TOLL-FREE 800/435-6856
(In Illinois 800/892-6831)

Proudly manufactured by the world leader in permanganate technology.

If you're limiting cathodic protection to this...

YOU'RE LOSING MONEY.

Because while you're protecting your water tower from the ravages of corrosion, your flocculator, clarifier, thickener, and filters may be rusting away.

To protect this expensive treatment equipment from corrosion, contact Wallace & Tiernan, leaders in the field. We'll design a W&T Cathodic Protection System to the specifications of your structure, install it, even maintain it. Such a system can help eliminate loss in capital investment by prolonging structure life ... minimizing corrosion-caused downtime.

For example, look into our POLATROL® Cathodic Protection System. It's designed to maintain protection at its optimum level automatically regardless of changes in water quality, temperature and level. It saves operators' time by eliminating manual adjustments. Then there's our PLATINEX® platinum-niobium anode designed to give reliable long-life protection with worthwhile economy. And there's the W&T Icing-tank System designed to withstand heavy ice in water tanks. Its success stems from the patented XL® Anode Assembly, a suspension designed to self-release when pulled down by encasing ice.
